Six new functions for NFI mte

Instant DIPs and Reprocessing

Speed up the mortgage process by getting an answer with an Instant DIP, and if the client changes their mind you can 'Change Data' and obtain a new decision without having to contact us.

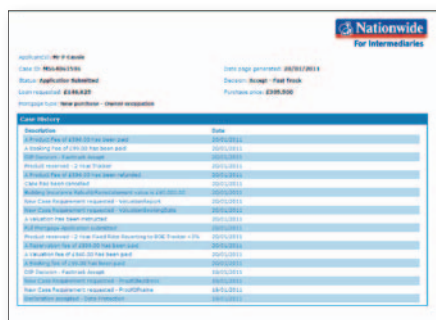

Reprocessing won't leave another footprint, so you can reassure your clients that their credit record won't suffer.

Improved Case Tracking

Our case tracking is fully automated, in real time, with no delays.

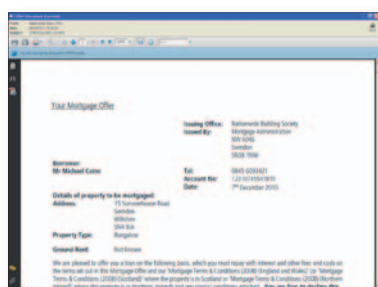

'Track' to view all the latest updates on the 'Case Requirements' and 'History' tabs in the MTE response page. All documents created by the system can be viewed and/or printed, so there's no need to contact us, it's all at your finger tips!

Faster Offers

All offers are available at point of sale, either instantly, or after a physical valuation and 'Case Requirements' are approved.

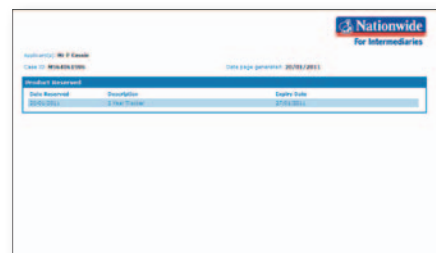

As soon as the offer is ready you'll receive an email alert to prompt you to 'Track' the case and obtain the offer via the MTE response page.

Standalone Product Reservation

You now have the option to reserve a product even before you have the property details and without completing the full mortgage application.

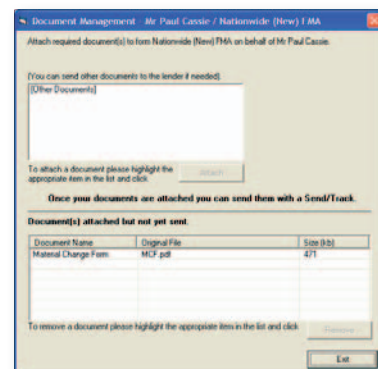

Giving your client the peace of mind their product is safe.

Scan and Attach

Cut down on paperwork with the power to scan original documents locally and then 'Attach' them straight onto the case.

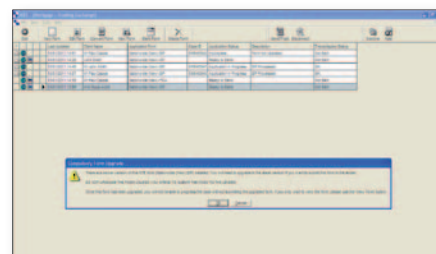

Documents will immediately appear on the case for us to verify. This means you experience much faster processing and quicker offers.

Enhanced Form Upgrade Process

The new form upgrade process ensures you are using the latest version of the form and any previously keyed data is automatically carried across.

This minimises additional keying, enables you to continue with the application quickly and saves you valuable time.
